

Installing Steps

1. Download LLama for Unreal Engine here:
<https://github.com/getnamo/Llama-Unreal/releases>
2. Create a new Unreal Project
3. Create the “Plugins” folder, and put the “Llama-Unreal” that you downloaded there.

4. In Saved, Create “Models” folder, then put your downloaded “.gguf” there.

5. Now, you have an integrated Llama in Unreal Engine.
